Dennis Landaverde

Front-end Developer

Software Engineering Professional with over 3+ years of experience writing well designed, testable, efficient, and readable code in web development. Understands development cycles using Agile methodologies. Experience in Frontend and Backend using Angular, TypeScript, Ruby on Rails, Java and MySQL. Wide experience in Front-End development using the Angular framework.

Professional Experience

2022 - May 2024

E-Commerce

Project: Trademark of Visa International Service Association and used under license by Peoples Trust Company.

Position/Role: Front-end Developer, develop reusable components and in charge of a specific product, maintaining it and improving its structure according to the client's requirements through user stories resolving defects and doing test cases for each US or DEF, all this under the Scrum methodology.

Languages: Angular Framework, Ruby on Rails and Java.

2021 - 2022

Commercial Real estate

Project: Changing the entire UX of the Market for the commercial real estate.

Position/Role: Front-end Developer, I upgraded the Angular project from version 7 to 13, addressing any arising errors. I redesigned the user experience of our web pages to meet client specifications outlined in Figma, introducing new sections and dynamic components. Additionally, I implemented features like property search with customizable filters and engaging carousels to showcase properties and partner companies. I also developed dynamic forms to capture essential company information and redesigned the footer for enhanced functionality.

Languages: Angular Framework.

January 2021 - October 2021
